

Year 1, T6—Castles and Dragons Computing Knowledge Organiser

Subject Specific Vocabulary

Word	Simple definition
sprite	A character within Scratch programs
command	An instruction given
program	A sequence of instructions
blocks	A piece of code that can be joined

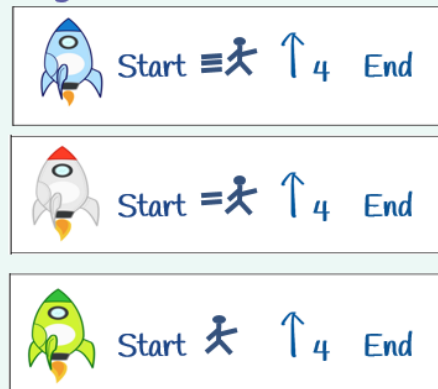

Programming animations

Sprites can be given commands which will trigger an event e.g they could be given a command to move.

Different blocks can be joined together to create different algorithms.

A program can be started by clicking on the Start block. clicking on a Start block.

Algorithms

Interesting App

Try the apps 'Castlerama' and 'Aurasma' to make the virtual feel more like reality

Home Challenge!

Try to go on Scratch Jnr at home and create your own program to run.

Can you design a castle background?
