Grouping Data

Objects can be grouped and classified based on their properties.

Vocabulary for describing

shape   size   colour   same
more than   less than   most   least

Objects or groups of objects can be described by their label. Their label helps them to be spoken about and found easily.

Grouping objects can make them more easily looked at and compared.

Comparing objects is when you look at what is similar and what is different.

Interesting App

PicCollage

App store/Google Play

Cost: Free

Combine pictures and text to make posters. You could make a poster about your favourite toys or how people should look after them.

Home Challenge!

Collect 10 of your favourite toys.

Can you find a way to group your toys? Give each group a label.

Is there more than one way to group them?
